

P209: Cabinet Mac Mini Setup *(not mobile unit)*

(displays to Left-Hand wall-mounted monitor)

1. Use the wall button panel on the left of the monitors to turn monitor on. 
(turn the right monitor off with power button on right hand side. No signal message is distracting.)

2. Turn Mac Mini on.

Power ON the Mac Mini using the black (hard to see!) power button along the rounded corner.

3. Set input to HDMI:

Press  on button wall panel. If there is no signal, use monitor remote and select **HDMI**.

4. Bluetooth Keyboard & Mouse

If keyboard and mouse are not responding, make sure each item is turned ON.

****There is a wired keyboard/mouse available behind the cabinet if you are having connection issues.**

5. If audio is needed, attach computer speakers from Room P220 to mini extension cable on top of cabinet.
